Overview

[top](#)

Storyboard is a presentation layer in Yellowfin that allows users to create slide shows with fully functional reports as well as text, images, and videos.

Navigation

[top](#)

There are several methods for navigating an Active Storyboard:

1. **Arrows** - Use the mouse to click on the left and right arrows displayed on the sides of the current slide to move.
2. **Slider** - Drag the slider to move through the Storyboard Slides. A popup with the name of each slide will appear as you do.
3. **Keyboard** - Use the Left and Right arrows to navigate through slides, and Up and Down to move between a Content slide and its Associated Content slides.
4. **Table of Contents** - Click on the name of a slide on the Table of Contents slide (if used) to navigate to that slide.

Menus

[top](#)

When your Storyboard is in Draft mode you will have access to three menus:

1. Storyboard
2. Slide
3. Collaborate

Storyboard Menu

This menu allows you to configure all the options applied to the Storyboard as a whole, including Theme selection.

See [Storyboard Settings](#) for more information.

Slide Menu

This menu allows you to configure all the options available to the current slide, including Slide Type.

See [Slide Settings](#) for more information.

Collaborate Menu

This menu allows you to configure who has access to your Storyboard.

See [Access](#) for more information.
