Overview

[top](#)
The Administration Console is a centralised configuration page that allows admin users fast access to all the controls they need to maintain the system.

The Admin Console is split into the following panels:

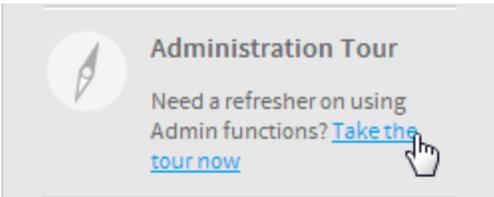

1. [Administration Tour & Help](#)
2. [Licence Countdown](#)
3. [Usage KPIs](#)
4. [Main Panel](#)
5. [Configuration Items](#)
6. [Administration Items](#)

Administration Tour & Help

[top](#)
This panel provides new administrators with a brief overview of the page and access to the Administration Tour storyboard and help.

Administration Tour

The Administration Tour storyboard is designed to give users a quick run through the components available in the Admin Console.

By default, if Tutorial Content was loaded during installation, the tour storyboard will be available as sample content. If tutorial content was not loaded, or a custom storyboard is to be used for this purpose, the Administration Tour can be configured through **Administration > Configuration > System Tab > General**. Here the user can select any active storyboard to use.

Help

The **Need Help?** section provides admin users with links to [wiki documentation](#) and the [support forum](#).

Need help?

Visit the [Yellowfin forum](#) or [wiki](#) to find the answers you are looking for.

This is only available when the application name is configured as **Yellowfin**. To change the application the following script can be run on the Yellowfin Configuration database:

```
insert into Configuration (IpOrg,ConfigTypeCode,ConfigCode,ConfigData)
values (1,'SYSTEM', 'APPNAME', 'NewApplicationNameHere')
```

The **NewApplicationNameHere** should contain the name you wish to assign the application.

Note: you will need to shutdown Yellowfin before applying this change.

Licence Countdown

[top](#)

This panel provides admin users with a quick status check of their licence. The countdown figure will change to **red** when there is less than **45** days left in order to draw the admin's attention. The expiry date itself is also displayed in the panel.

Licence Days Left

Licence expires

26 April 2014 74 Days

Usage KPIs

[top](#)

These are designed to help the administrator monitor how much of the system content is actively used.

Users Yellowfin Users Versus Licence 3 / 9999	Unique Logins Last 30 Days  76	Dashboards Accessed last 30 days Accessed 6 / 6	Reports Read last 30 days Read 41 / 98
-------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------

KPI	Description
Users	This monitors the number of registered writers vs. the number of licenced writers, allowing the administrator to see how close they are to the licence limit. When there are less than 5% users left available on the licence, the number will be highlighted red .
Unique Logins	This monitors the number of unique user logins in the last 30 days, allowing the administrator to see how the system traffic is tracking.
Dashboards	This monitors the number of unique dashboard tabs accessed each day for the last 30 days vs. the total number of active tabs available, allowing the administrator to see what proportion of tabs are used. When less than 50% of dashboards are used, they're highlighted red . When more than 75% are used, they're highlighted blue
Reports	This monitors the number of unique reports accessed each day for the last 30 days vs. the total number of active reports available, allowing the administrator to see what proportion of reports are used.

Main Panel

[top](#)

This contains commonly used definitions and settings in Administration. Expand the titles below to view more information.

Data Sources

Connection	Description	
Sample Data	CSV	
Samples	Sample Data	
Ski Team	Ski Team is the demonstration and tutorial database.	

[Add](#)

This displays a list of data source connections currently available in the system. From here the administrator can add, edit, or delete connections.

See [Data Sources](#) for more information.

Views

	View	Description	
	Sample Data		4 Views
	Samples		1 View
	Ski Team		2 Views
	Ski Team	This is a tutorial view for training and demo purposes.	
	Ski Team (Copy)	This is a tutorial view for training and demo purposes.	

[Add](#)

This displays a searchable list of views currently available in the system. From here the administrator can add, edit, copy, or delete views.

See [Views](#) for more information.

Users

	Violet Southgate Admin	▼

User Import
Add

This displays a searchable list of users currently in the system. From here the administrator can add, edit, email, change role assignments, import, and delete users.

See [Users](#) for more information.

Roles

Roles

	Members
Admin	2 ▼
Corp Writer	1 ▼
Report Consumer Default	0 ▼
Report Writer	0 ▼

Add

This displays a list of roles currently available in the system, with a count of users assigned to each. From here the administrator can add, edit, copy, and delete roles.

See [Roles](#) for more information.

User Groups

Name	Description	Status	Secure	Members	
Admin Users	Users assigned the Admin Role.			2	

[Add](#)

This displays a list of user groups currently defined in the system, with a count of users assigned to each that you can click on to view a list. From here the administrator can add, edit, or delete groups.

See [User Groups](#) for more information.

Content Categories

Content Category	Content Sub Category		
Tutorial			
	Approval Category		
	Athletes		
	Camp		
	Draft		
	KPIs		
	Marketing & Booking		
	Training		

[Add](#)

This displays a list of content categories and sub categories currently defined in the system. From here the administrator can add, edit, or delete content categories.

See [Content Categories](#) for more information.

Field Categories

Name	
Agency	x
Athlete	x
Athlete Location	x
Athlete Payment	x
Booking	x
Camp	x
Campaign	x
Parameters	x

[Add](#)

This displays a list of field categories currently defined in the system. From here the administrator can add, edit, or delete field categories.

See [View & Field Categories](#) for more information.

View Categories

Name	Field Categories	
General Views	1	x
Ski Team	11	x

[Add](#)

This displays a list of view categories currently defined in the system. From here the administrator can add, edit, delete, and assign/unassign field categories to/from view categories.

See [View & Field Categories](#) for more information.

Org Reference Codes

Name
Booking Method
Country
Demographic
Gender Formatted

This displays a list of org reference codes currently defined in the system. From here the administrator can edit an org ref code.

See [Org Reference Codes](#) for more information.

Storyboard Themes

Keys

Yellowfin 7

Add

This displays a list of storyboard themes currently defined in the system. From here the administrator can add, edit, copy, or delete a theme.

See [Storyboard Themes](#) for more information.

Content Tags

Tag	Usage
Athletes	x
Camp	x
Tutorial	x

[Add](#)

This displays a list of content tags currently defined in the system. From here the administrator can add, edit, view usage, and delete tags.

See [Content Tags](#) for more information.

Date Filter Periods

Active	Period	Type
<input checked="" type="checkbox"/>	Custom	Between Date
<input checked="" type="checkbox"/>	Last 12 Full Weeks	Between Date
<input checked="" type="checkbox"/>	Last 3 Months	Between Date
<input checked="" type="checkbox"/>	Last 4 Full Weeks	Between Date
<input checked="" type="checkbox"/>	Last 7 Days	Between Date
<input checked="" type="checkbox"/>	Last 8 Full Weeks	Between Date
<input checked="" type="checkbox"/>	Last Business Week	Between Date
<input checked="" type="checkbox"/>	Last Calendar year	Between Date

[Save](#)

This displays a list of available date filter periods in the system. From here the administrator can enable/disable periods from use.

See [Date Filter Periods](#) for more information.

GeoPack Management

Pack Name	Creation Date	Import Date	Layers	
Countries	11-09-2014	11-09-2014	- Country	×
Australian Postcode Pack	27-08-2014	11-09-2014	- State - LGA - Postcode	×

[Add or Update GeoPack](#)

This displays a list of available GeoPacks in the system. From here the administrator can import, edit, and delete GeoPacks.

See [GeoPack Setup](#) for more information.

Configuration Items

[top](#)

Icon	Item	Description
	Configuration	This allows the user to configure a wide range of settings that fall under Email, System, Region, Authentication, and Integration categories.
	Content Settings	This allows the user to configure a wide range of content settings and formatting defaults that fall under Report, Chart, Dashboard, Storyboard, and Browse Page categories.
	Images and Maps	This allows the user to load new images into the system, and define items such as raster maps, and WMS layers. Raster maps are images with each zone specified as a unique colour which defines the zones to be replaced by heat map colouring.
	Email Template	This allows the user to customise the look and feel of system-generated emails.

Administration Items

[top](#)

Icon	Item	Description
	Session Management	This allows the user to view a list of current sessions, and close selected sessions. This is useful if you have a user that has logged on from one IP address and then tries to log on from another but has been denied access.
	Schedule Management	This allows the user to view and manage a list of schedules defined in the system. Schedule types include: Broadcast, Cached Filter Refresh, Cached View Refresh, Composite View Refresh, Report Refresh, Report Subscription, and Source Filter Refresh.
	Dashboard Management	This allows the user to view all available dashboards, check their status, subscriptions, and report numbers as well as having the option to edit and delete selected tabs.
	Licence Management	This allows the user to view the current licence parameters and usage, and upload new licences.
	System Information	This allows the user to view current system information including version details, security settings, system resources and more. Sometimes support may ask you for an XML export of these details to assist with troubleshooting.
	Content Translation	This allows the system to provide User Entered reporting content across multiple languages by allowing users to translate content such as Report Names, Column Titles, Chart Labels, etc.

	Client Organisations	This allows users to view and manage a list of client organisations.
	Export	This allows users to export content definitions to .xml files for migration and backup purposes.
	Import	This allows users to import content definitions from .xml files for migration and backup purposes.
