Overview

top
The Report Details button, found on an active report's menu bar, allows you to view a useful collection of information on the report.

Report Details

top
When you click on the Report Details button you will be presented with a window consisting of three tabs, the first of which is the Report Details tab. On this tab you will be presented with the following:

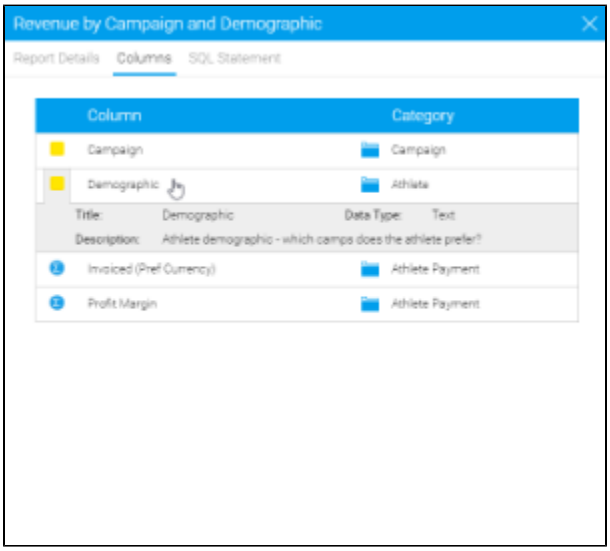

Report Details	
Name	Name of the report, supplied by the report writer.
Description	Description of the report, supplied by the report writer.
Category	The category the report is currently stored in.
Sub Category	The sub category the report is currently stored in.
Expert	If the sub category requires approval, provides the assigned user or group.
Update Type	Edit Existing Report
Report Template	Display option of the report, Eg. Table, Table and Chart, etc.
Max Rows Returned	Max number of rows to be returned in the report. Set at the source connection and confirmed on the report data page. Eg. 10000
Source System	The source connection the report is based on.
Created By	Method of report builder used. Eg. Drag and Drop Builder
View Name	The view the report is based on.
View Description	Description of the view the report is based on. Provided by the view builder.

Report URL	URL generated for the report.
Report Stats	
Run Count	Number of times the report has been run.
Average Run Time	Average length of time the report takes to run.
Last Run	The length of time the report took to run last.
Modified	Last modified date and time.
Access Rights	
Level of Access	Access setting applied to the report sub category.

Column Definitions

top
The second tab in the Report Details window contains information on the fields used in the report.

Each field will have the following information listed:

Property	Description
Field	Name of the field, defined at the view level.
Group	Name of the category the field is attached to in the view.
Type	Type of field (Metric or Dimension)
Data Type	Field type defined in the source database
Description	Description of the field, defined at the view level.

SQL Statement

top
The third tab in the Report Details window contains the SQL generated by Yellowfin for the report. This tab can be restricted through Role Permissions so that only advanced users can view it if necessary. This tab also contains an **Export SQL** button, allowing you to export the query to a .sql file.

Revenue by Campaign and Demographic
