

Special Purpose Charts

Overview

[top](#)

Type	Icon	When to Use
Funnel		Used to show the status of stages in a process.
Proportional Infographic		Displays segments on an image, with the segment size representing metric value.
Comparative Infographic		Displays images sized in such a way to correspond to a metric.
Radar		You want to compare data by integrating multiple axes into a single radial figure.
Waterfall		Waterfall charts are a special type of Floating Column Chart. A typical waterfall chart shows how an initial value is increased and decreased by a series of intermediate values, leading to a final value.
Event		Maps the occurrence of events against the values of a numeric data set over time.
Week Density		Shows the density of occurrences based on hour relative to other densities on the same day of the week.
