Overview

[top](#)

A segmented chart for which the behaviour is determined by the data selected.

Chart Data Options

Option	Description
Horizontal Axis	You may select up to two different fields to use as columns in your trellis.
Vertical Axis	You may select up to two different fields to use as rows in your trellis chart.
Colour	You can select one field to split your values by colour.
Size	When you have a scatter plot trellis you will also be able to select a metric to use for the size of the bubbles.

Note: at least one of either the Column or Row fields selected must be a metric.

Summary

In order to set up a Histogram Chart you will need:

1. Create a report with chart display
 - a. Select field(s) to use as the **Horizontal Axis**
 - b. Select field(s) to use as the **Vertical Axis**
 - c. Select a field to use as the **Colour** (optional field)
 - d. Select a field to use as the **Size** (optional field)
2. Create your chart, selecting **Trellis** as the type under the **Analytical** heading
3. Provide the **Horizontal Axis**, **Vertical Axis**, **Colour**, and **Size** options
4. Customise the Chart as required
5. Proceed to the **Output** step
6. **Save** your report
