- [Filters](#)
- [Delivery Rule](#)
- [Schedule](#)
- [Save an FTP Broadcast](#)

Overview

[FTP Schedule#top](#)

1. Ensure your report is active (not in Draft mode).
2. Click on the **Broadcast** button in the main navigation menu.

3. In the Broadcast menu, click on the **Create New** button.

4. Select the **FTP Schedule** option.

5. The FTP Broadcast window will appear, providing you with the following options:

FTP Broadcast: Athlete Demographic Spread

File Name

Append Broadcast Date

Server Hostname:

Server Directory:

User Name:

Password:

User Prompt Filters

What filter values would you like to use for the broadcast?

Current Filter Values

Continuous Schedule

The report will always be delivered based on the selected schedule.

Submit

File Name & Type

FTP Schedule#top

- 1. Provide a file name without any file extension (eg, SpendingReport).
- 2. Click on the icon of your preferred format from the list of icons.
- 3. Check the **Append Broadcast Date** if you wish this to be included in the file name.
- 4. Check the **Append Broadcast Time** if you wish this to be included in the file name. This will prevent repeat broadcasts with the same filename being overwritten.

FTP Broadcast: Athlete Demographic Spread

Append Broadcast Date

Append Broadcast Time

Secure PDF

- 5. If you've chosen PDF as your preferred format, you have the option of checking the Secure PDF box which lets you add password security to the PDF file.

FTP Details

FTP Schedule#top

The following details are required to send a report via FTP:

Server Address	This is the address in which the server you are uploading the report to sits
Server Directory	This is the directory where you want the report to be sent to on the server.

User Name	This is the username of the server you are trying to access.
Password	This is the password of the server you are trying to access.

Server Hostname:

Server Directory:

User Name:

Password:

Filters

[FTP Schedule#top](#)

If your report contains filters you will have the option to select which of these are applied to the FTP Report. The options include:

1. Current Filter Values
2. Default Filter Values
3. Saved Filter Set Values (there will be a list of available sets displayed)

User Prompt Filters
What filter values would you like to use for the broadcast?

Continuous Schedule
The report will always be delivered based selected schedule.

Delivery Rule

[FTP Schedule#top](#)

A Delivery Rule is used for exception reporting. If you wish to send a report only if it meets certain criteria (for example: Revenue is less than 100,000) then you will need to add a rule.

1. Change the **Always Send** drop down list to **Only if Delivery Rule met**
2. Click on the **Click here to add rule** link
3. You will now have the choice of building a rule based on:
 - a. If one or more rows match the rule (e.g. is there a transaction less than \$1000) OR
 - b. If the totals for the report match the rule (e.g. are the total sales less than \$100000)
4. Select the field you wish to apply the condition on, click **Add**, and apply your condition. Click **Update** to save it. You can add multiple conditions here if required.
5. Click **Save & Close** to apply your condition(s)
6. Your rule will now be displayed on the FTP Schedule window

Alert-based broadcast

Continuous

Alert

The report will be delivered based on the selected schedule, if the results match the alert rules.

Invoiced Amount Less than or equal to \$1,000,000

Edit Alert Delivery Rules

Schedule

[FTP Schedule#top](#)

The last step is to define the schedule for your Broadcast.

The frequency is highly flexible. For example, monthly reports can be based on a certain day of the month, like this:

Frequency:

Monthly

Each

Day: 15

...or a certain day of a certain week within the month, like this:

Frequency:

Monthly

On

First

Monday

1. Select the frequency. Depending on the option selected here, you may be required to provide further details. (for example, if Fortnightly is selected, you will be prompted to select either the first or second week of the fortnight to send in, as well as the day of the week).
2. Sometimes you may find you need to set the Time Zone, and local time for delivery, or that you wish to limit the schedule period or receive a notification if the broadcast is not sent. Select the various options according to your requirements:

Frequency:

Weekly

Saturday

Australia

Sydney (+11:0...

12 ...

:00

Limit Schedule Period

Failure Notification

Administrators

This will run every week, on Saturday.
