Overview

[top](#)

Yellowfin's mapping suite has several interactive features to allow the user to view different sets and levels of data.

Zoom & Navigation

[top](#)

Hover Navigation

The hover navigation, enabled in the Settings menu, allows the user to zoom in & out and navigate around the map.

Bottom Navigation

The bottom navigation, enabled in the Settings menu, allows the user to zoom in & out, click on an area of the chart to re-centre, and reset to the original zoom level.

Mouse Scroll Zoom

All maps now have zooming enabled with the scroll of a mouse, just hover over the map and scroll up or down to zoom in or out.

Layer Selection

[top](#)
If the map you're viewing has additional layers that are enabled as Selectable, then you will have a layer selection panel on the right hand side of the map.

Clicking on the arrow will expand the panel and allow you to select layers to display or hide.

Tooltips

[top](#)

Active Tooltips

Active tooltips on maps allow the user to hover over an area, highlighting it and displaying its value.

Google Tooltips

Google map tooltips allow for a label, description, and link if desired. The user just clicks on a pin to display the bubble and contained information.
