Overview

[top](#)

These are commonly used in the financial sector, specifically designed to show trends and movements in trading datasets.

Financial Line		Use this chart to display a trading value with a subchart displaying volume.
High Low		Displays the daily high, low, opening, and closing values with tick positions corresponding to opening and closing values.
Candlestick		Shows the daily high, low, opening, and closing values with different colour bars depending on the daily direction (positive or negative).

Chart Data Options

Option	Description
Horizontal Axis	This is the label for the X axis, time series data.
Start	Share value at the beginning of the time period (commonly: day)
End	Share value at the end of the time period (commonly: day)
High	The highest value the share reached in the time period
Low	The lowest value the share reached in the time period
Volume	Number of shares traded in the time period
Trend	A metric the user created to display a trend line on the chart
