

Logging In

Overview

[top](#)

In order to get to know Yellowfin you will first need to have access to an installation. To set up Yellowfin yourself follow the installation steps outlined [here](#). Be sure to install the **Tutorial Database** during step 4 of the installation if you wish to use the same sample content that is demonstrated throughout the wiki examples.

An Administrator User is created by default during the installation process. This user has access to all the functions required for this evaluation including administration and reporting functions.

Option	Value
Username	admin@yellowfin.com.au
Password (default)	test

First Login

[top](#)

1. To login go to the entry page for your installation of Yellowfin within your web browser. This is usually at:

```
http://<YourYellowfinServer>:<port>
```

Component	Description
<YourYellowfinServer>	This is the name of the server that Yellowfin has been installed on. Look for your computer name if you have installed on your own machine.
<port>	This is the port that Yellowfin has been told to use during Step 6 of the Installation.

An example of a URL might be:

```
http://localhost:8080
```

2. Enter the following details:

- Username: **admin@yellowfin.com.au**
- Password: **test**

3. Press the **Login** button.

Username:

admin@yellowfin.com.au

Password:

....

Login

4. You should now be logged in to Yellowfin and taken to a Welcome page.

As this is your first time logging in to the system you will be presented with a Welcome page prompting you to update your password and provide some details for your User Account.

5. Update your password and provide any details you wish. A description of all the options can be found [here](#).

The screenshot shows a web interface titled "Welcome System Administrator". Below the title, it says "We need some information to set up your profile". There are three input fields: "System" (containing "System"), "Administrator" (containing "Administrator"), and "admin@yellowfin.com.au". Below these is a section "Change your password" with three password input fields, each containing four asterisks. At the bottom is a "Your profile" section with a "Job Title" input field and a text area labeled "Write something about yourself".

6. Click the **Save Personal Settings** button to continue.

Save Personal Settings

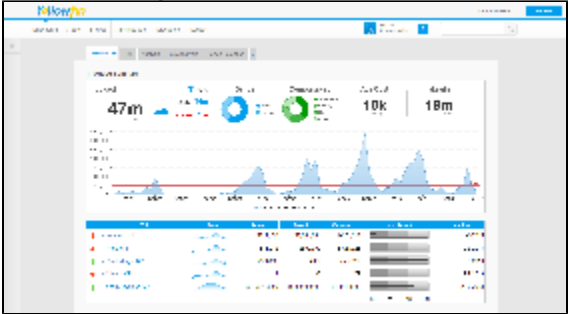

You will now find yourself on a secondary Welcome page that guides you to either an Introductory Storyboard to view, or your Dashboard.

7. Click the **Show me my Dashboard** button to proceed to the Dashboard page of Yellowfin.

The screenshot shows a web interface titled "Welcome System Administrator". Below the title, it says "Let's get started...". There is a section "New to Yellowfin? Take a tour using Storyboard" with a cartoon character saying "Welcome!". To the right, it says "Welcome to Yellowfin" and "This Storyboard is designed as a quick intro to Yellowfin for first-time users." Below this is a blue button "Take a tour now" with a right arrow. At the bottom, it says "No Thanks. Take me to my Dashboard" and "You can always find the tour in your list of bookmarks to access it later." Below this is a blue button "Show me my dashboard" with a right arrow.

The Dashboard page will now load, looking similar to the example on the right.

Further Information
