

Presto

Follow the instructions below to connect Yellowfin to a Presto database.

Yellowfin does not ship with the driver required for this connection due to licensing/paywall reasons. You will need to manually upload the driver through the [Plugin Manager](#) or [Creating a Basic Data Source Connection](#).

1. Click on the **Create** button and choose the data source option.

2. Select **Presto** from the database list

Add a Data Source

FEATURED

Amazon Redshift

Google BigQuery

Microsoft SQL Server

MySQL

Oracle

PostgreSQL

Snowflake

Cube

JNDI

CSV

Please, select the kind of data source you want to add.

3. When the New Connection popup appears, provide a name and description for your database.

4. **Connection String:** when selecting Connection String you have the same functionality as in [Generic JDBC Data Source](#).

How To Connect

☐ Details
☒ Connection String

5. **Presto** configuration fields:

Authentication Adapter

Standard Authentication

☒ Include Schema in SQL

Database Host

Database Port

8080

Database Name

JDBC Driver

com.facebook.presto.jdbc.Presto...

User Name

Password

6. **Authentication Adapter:** Specify an authentication method for the database adapter. More details [Advanced Connection Editor](#).

7. **Include Schema in SQL:** Select this checkbox to add the schema name when addressing database tables in SQL queries.

8. **Database Host:** Enter the name or IP address of the server hosting the Presto database.

9. **Database Port:** The TCP/IP port number used for this database connection. The default port for this is 8080.

Database Port

8080

10. **Database Name:** Specify the name of the database containing the required data.

11. **JDBC Driver:** The JDBC driver talks to your Presto database.

12. **Username:** Enter the username of your database account.

13. **Password:** Provide the password of the above account.

14. Toggle Advanced Settings to see more settings.

▼ Advanced Settings

15. Once you have completed your connection information, you will have several options:

← Back

Save

Test Connection

Cancel

- a. **Back:** This will navigate to the database selection.
- b. **Cancel:** This will close the New Connection popup.
- c. **Test Connection:** This will test the connection parameters you provided to ensure it can connect to your database. If the connection is successful, an indicator will appear and you will be able to save the connection.

← Back

Save

✓ Test Connection

Cancel

- d. **Save:** This will allow you to save your connection and navigate to the Success page.
