Overview

Waterfall charts show how an initial value has increased and/or decreased by a series of intermediate values, leading to a final value.

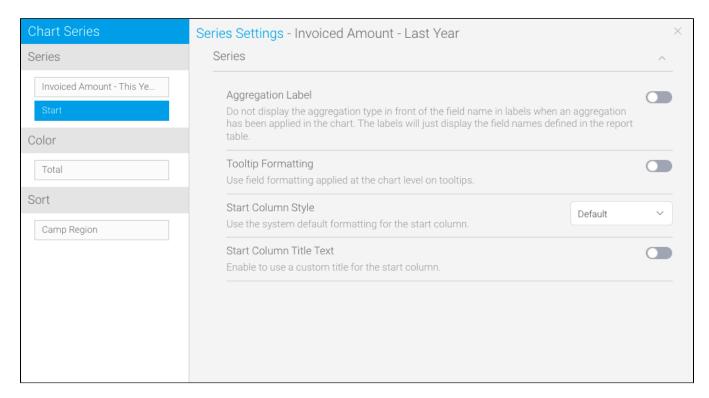

Waterfall chart data options

Option	Description
Horizontal Axis	Must be a dimension. This is the category label for the X axis.
Vertical Axis	Must be a metric. This is the category label for the Y axis.
Color	Can be a metric or a dimension. The color field must match the horizontal axis field when a dimension is used.
Start	Must be a metric. This option configures the starting value of the chart.
Animation	Must be a date or time field.

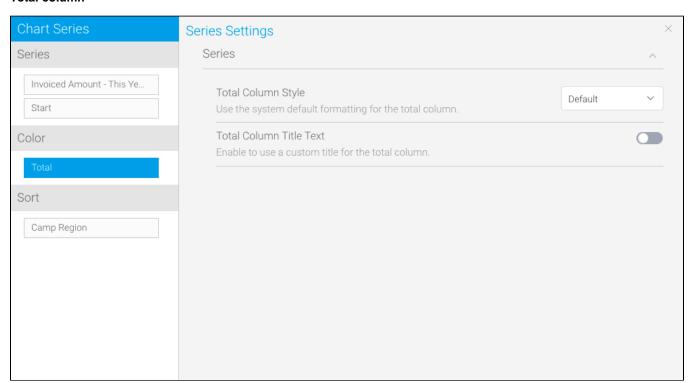

Formatting options

Creating a waterfall chart

1. Create a new Report

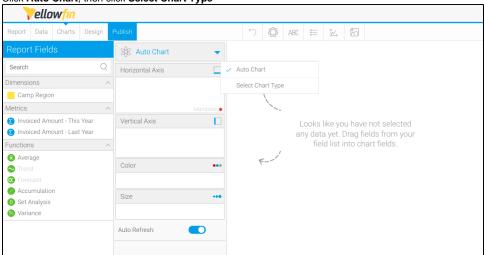

Use your mouse to drag your data from the left panel to the **Columns**, **Sections** and **Filters** fields Waterfall charts require one dimension and at least one metric

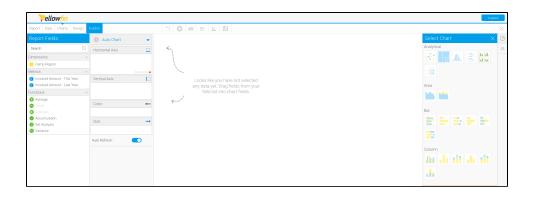

2. Click Charts to create your chart

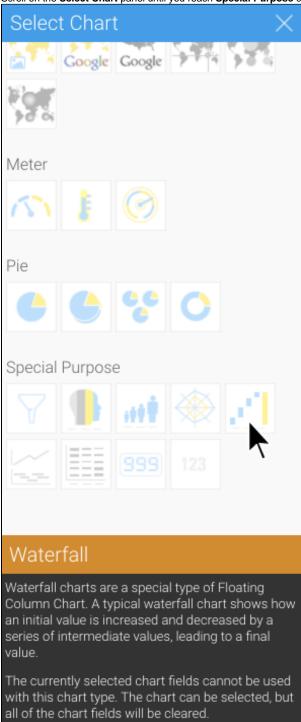

3. Click Auto Chart, then click Select Chart Type

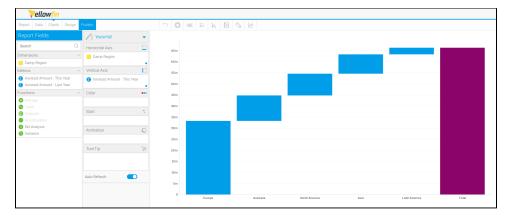

The Select Chart panel will slide in from the right-hand side of the page

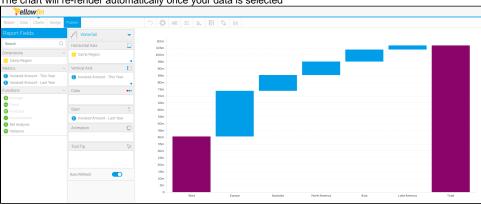

4. Scroll on the Select Chart panel until you reach Special Purpose charts, and click Waterfall as the chart type

- 5. Use your mouse to drag a dimension from the left panel to the Horizontal Axis field
- Use your mouse to drag a metric from the left panel to the Vertical Axis field The chart will render automatically once your data is selected

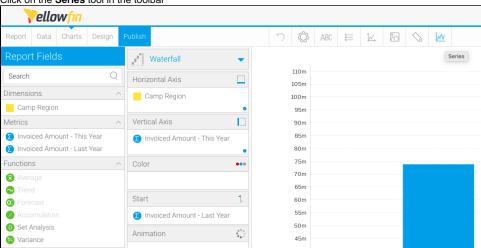

7. To add a start column to the chart, use your mouse to drag a **metric** to the **Start** field The chart will re-render automatically once your data is selected
