- [SQL statement](#)

## Overview

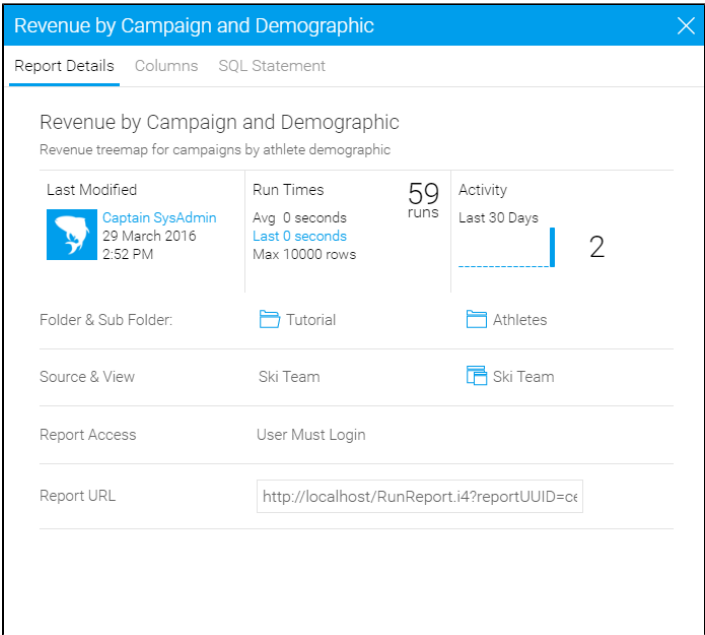

The Report Details button, found on an active report's menu bar, allows you to view a useful collection of information on the report.

[top](#)

## Report details

When you click on the **Report Details** button, you will be presented with a window consisting of three tabs, the first of which is the **Report Details** tab. On this tab you will be presented with the following:

Report Details	
Name	Name of the report, supplied by the report writer.
Description	Description of the report, supplied by the report writer.
Folder	The folder the report is currently stored in.
Sub Folder	The sub folder the report is currently stored in.
Expert	If the sub category requires approval, provides the assigned user or group.
Update Type	Edit Existing Report
Report Template	Display option of the report, Eg. Table, Table and Chart, etc.
Max Rows Returned	Max number of rows to be returned in the report. Set at the source connection and confirmed on the report data page. Eg. 10000
Source System	The source connection the report is based on.

Created By	Method of report builder used. Eg. Drag and Drop Builder
View Name	The view the report is based on.
View Description	Description of the view the report is based on. Provided by the view builder.
Report URL	URL generated for the report.
Report Stats	
Run Count	Number of times the report has been run.
Average Run Time	Average length of time the report takes to run.
Last Run	The length of time the report took to run last.
Modified	Last modified date and time.
Access Rights	
Level of Access	Access setting applied to the report sub category.

## Column definitions

The second tab in the Report Details window contains information on the fields used in the report.

Revenue by Campaign and Demographic

Report Details Columns SQL Statement

Column	Category
 Campaign	 Campaign
 Demographic	 Athlete
Title: Demographic      Data Type: Text	
Description: Athlete demographic - which camps does the athlete prefer?	
 Invoiced (Pref Currency)	 Athlete Payment
 Profit Margin	 Athlete Payment

Each field will have the following information listed:

Property	Description
Field	Name of the field, defined at the view level.
Group	Name of the category the field is attached to in the view.
Type	Type of field (Metric or Dimension)
Data Type	Field type defined in the source database
Description	Description of the field, defined at the view level.

## SQL statement

The third tab in the Report Details window contains the SQL generated by Yellowfin for the report. This tab can be restricted through Role Permissions so that only advanced users can view it if necessary. This tab also contains an [Export SQL](#) button, allowing you to export the query to a .sql file.

The screenshot shows a window titled "Revenue by Campaign and Demographic" with a close button (X) in the top right corner. Below the title bar, there are three tabs: "Report Details", "Columns", and "SQL Statement". The "SQL Statement" tab is selected and highlighted. The main area of the window displays a SQL query in a light gray text box. The query is as follows:

```
SELECT DISTINCT
  "CAMPAIGN"."CAMPAIGNDESCRIPTION",
  "ATHLETEFACT"."DEMOGRAPHIC",
  SUM("ATHLETEFACT"."INVOICEDAMOUNT" *
    "INTERNATIONALBANKRATE"."OFFSETRATE"),
  SUM(("ATHLETEFACT"."INVOICEDAMOUNT" *
    "INTERNATIONALBANKRATE"."OFFSETRATE") - "ATHLETEFACT"."COST")
FROM "ATHLETEFACT"
INNER JOIN "CAMPAIGN"
ON (
  "ATHLETEFACT"."CAMPAIGNID" = "CAMPAIGN"."CAMPAIGNID"
)
INNER JOIN "INTERNATIONALBANKRATE"
ON (
  "ATHLETEFACT"."BOOKINGCURRENCY" =
  "INTERNATIONALBANKRATE"."BASECODE"
  AND "ATHLETEFACT"."STARTDATE" >=
  "INTERNATIONALBANKRATE"."RATESTARTDATE"
  AND "ATHLETEFACT"."STARTDATE" <
  "INTERNATIONALBANKRATE"."RATEENDDATE"
)
AND (
  "INTERNATIONALBANKRATE"."OFFSETCODE" = 'AUD'
)
GROUP BY
  "ATHLETEFACT"."DEMOGRAPHIC",
  "CAMPAIGN"."CAMPAIGNDESCRIPTION"
```
