

Developer Toolkit

This section provides detailed guides and documentation that will allow developers to extend Yellowfin functionality and use APIs in their own environments, amongst other things. These guides are divided into the following categories.

Restyling Yellowfin

Implement custom corporate branding to Yellowfin.

[Learn more.](#)

Integrating Yellowfin

Embed various elements of Yellowfin into a web-based application.

[Learn more.](#)

Extending Yellowfin

Extend out of the box Yellowfin functionality using the plug-in framework.

[Learn more.](#)

Deploying Yellowfin

See a selection of guides on setting up different environments.
