Group List

[top](#)
This section describes how Groups are used within the application. Groups are a vital element of Yellowfin security and Broadcast processes. Groups assist users by allowing commons sets of people to be added in to general groups which can then be attached as a single entity to various elements within the application. Groups can be created and managed through the Admin Console. Once a group has been defined there are processes within Yellowfin that will automatically maintain members of a group on a regular basis.

User Groups

Name	Description	Status	Secure	Members	
Administrators	This group contains all users with th...	✓		3	×
Users	This contains all users of the system.	✓		7	×

Add

Create Groups

[top](#)
To create a new Group either click the **Add** button at the bottom of the groups list in the Admin Console.

Name	Description	Status	Secure	Members	
Administrators	This group contains all users with th...	✓		3	×
Users	This contains all users of the system.	✓		7	×

Add

Group Details

You will now be taken to the Group Details page where you will have to provide the following:

Group Details

Name:

Users

Description:

This contains all users of the system.

Group Status:

☒ Active

Group Security:

☒ Secure

Only group members will be able to edit this group.
Make sure you add yourself.

1. **Name:** enter a name for the group that will be used to identify it throughout the system.
2. **Description:** enter a description for the group that will help define its intended use.
3. **Group Status:** activate the group in order to use it throughout the system.
4. **Group Security:** secure the group if you only wish group members to be able to make adjustments to the group.

Default Dashboards

If you wish to automatically add dashboard tabs to a user's dashboard when they are created you can assign the default tabs for a user group. Choose the tab and click 'add' to add them to the list of tabs. The order you add tabs to a user group will be the order they are sorted on the dashboard (see the numbered list pictured below). All these tabs will be created for a new user when they first login to Yellowfin.

Default Dashboard Tabs

Dashboard Tab:

Campaign Analysis ▾

 Add

Description:

Assigned:

× 1: Sales Performance

× 2: Campaign Analysis

If a user is a member of more than one group with Default Dashboard Tabs, the sort order cannot be guaranteed.

Note: this only adds tabs to new users when they are created, once added users can then remove these tabs if they desire.

Group Members

To assign users to a group you will have to create member records. This is done by deciding how members should be assigned. To assign members you can either add in specific users or specific types of users. For example you could create a group that includes all users with the role of 'Public Writer'. The following member types are available from within Yellowfin:

Member Selection

Add:

Search

Members:

Consumer & Collaborator	Include ▼	×
Personal Content Writer & Collaborator	Include ▼	×
Public Content Writer & Collaborator	Include ▼	×
Public Content Writer & Collaborator - Advanced	Include ▼	×
System Administrator	Include ▼	×

Person	Individual users of Yellowfin.
Role	If you wish to select all users from a selected Yellowfin role – such as administrators then select role.
Group	Pre-existing groups that have been created in the group management list.
LDAP Group	If you have configured your assess to use LDAP directories then you will be able to select an LDAP group. Yellowfin will synchronise with this group on a daily basis.

The member control allows you to determine if the user should be included or excluded from the group. For Example you might want to include all Public Writers in a group but **exclude** John Smith.
If a user is excluded from a group then this overrides any record from which they might be included. The exclusion process is the last step of building the group members.

1. Select the type of member you want to add to a group
2. Determine if you wish to include or exclude them from the group
3. Click add to add them into the members list

Once complete, click **Save** to add the group.

Save

Cancel

View Members

[top](#)

When viewing the Group List on the Admin Console, you can click on the number of members to view a list of users currently assigned to a group.

Edit Group

[top](#)

In order to make changes to a group definition, simply locate the group in the Admin Console and click on its name to access the Group Details page.

Name	Description	Status	Secure	Members	
Administrators	This group contains all users with th...	✓		3	×
Users	This contains all users of the system.	✓		7	×

Delete Group

[top](#)

In order to delete a group definition, simply locate the group in the Admin Console and click on the **x** to the right of it. This will only remove the group, not the users assigned to it.

Name	Description	Status	Secure	Members	
Administrators	This group contains all users with th...	✓		3	
Users	This contains all users of the system.	✓		7	×

Content Approvers

Upon selecting a user group for content approval, all the group members will receive notification emails. Any of them may then approve or reject the content by following the approval process.
