## Overview

The browse page allows you to explore and locate your content, including Reports, Dashboards, Storyboards, and Discussions.

Thumbnails

The Thumbnail Layout displays your content in a gallery style view, using thumbnails to preview each item.

[See \*Thumbnail Layout\* for more information.](#)

Folders & List

The Folder and List Layouts display a list of links to each piece of content. You can preview a selected item by viewing its thumbnail in the left hand panel.

[See \*Folder & List Layouts\* for more information.](#)

## Configuration

### System Configuration

The Browse Page can be restyled and configured to suit your Yellowfin instance. An Administrator can access these settings through **Adminsitration > Content Settings > Browse** tab.

## User Configuration

Individual Users also have the option to customise the number of columns they have displayed on the Browse Page Thumbnail Layout. They just navigate to their settings by clicking on their **Name > Settings** and define the **Browse Page Columns** value.
