Discussion

Overview

Discussion is used to allow members of the business to collaborate, brining users, Yellowfin Content, and external links together in one place to be viewed and discussed. Discussion is tightly integrated with Timeline so that users keep up to date with posts made in a Discussion by viewing updates in their Timeline feed.
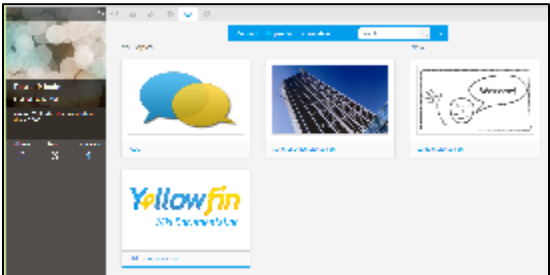

Discussion Components

The Discussion area in Yellowfin consists of Discussion Topics, which are made up of four main components:

Tab	Description
Discussion Topic	This displays the main feed of the discussion, with all threads and activity shown. From here users can post, reply, and view threads.
Content	Users are able to add Reports, Dashboard Tabs, and Storyboards to their posts. Any piece of content posted in a Discussion topic is listed in the Content area.
People	These are users that are following and posting within the Discussion Topic.
Settings	Options relating to the Discussion Topic as a whole can be configured here.
