Overview

[top](#)

The Column format tab contains a number of sections that you can use to format you fields.

Each of these sections is described below.

Option	Description
Display	To change the display name of the column from the default value simply update this field.
Format	Each data type will have a unique set of format options – eg Text, Date or Numeric. <i>See Display Formats for details on each type.</i>
Sub Format	Depending on the format option you have chosen for the column above you will have a separate set of sub format options. Select the appropriate sub format option.
Date Other	If you select 'Other' from the date sub format you will be able to build your own custom date format. For example to create a Japanese date format which includes characters, eg. 2003?4?2?would be created by adding in: yyyy?M?d ?

Decimal Places	<p>If you have a defined a numeric format you can set the number of decimal places to be defined. This can be used to define cents in a decimal place for \$20.00 by adding in:2</p> <p>Note: To convert numeric data by doing divide by 1,000 calculations etc you would use the data conversion options in advanced functions which are available on the Report Fields page.</p> <p style="text-align: center;">See Advanced Functions for more information.</p>																																				
Prefix	<p>The prefix is used to include additional characters before the value that is returned from the data base. This can be used to define currency for \$20.00 by adding in: \$</p>																																				
Suffix	<p>The suffix is used to include additional characters after the value that is returned from the data base. This can be used to define percentage for 30% by adding in: %</p>																																				
Rounding	<p>The rounding format allows you to choose how a decimal value should be rounded.</p> <ul style="list-style-type: none"> • Round Up: Will round any decimal up eg. 1.1 to 2 • Round Down: Will round any decimal down eg. 1.9 to 1 • Round Half Up: Rounds 0.5 and above up • Round Half Down: Rounds 0.5 and below down 																																				
Thousand Separator	<p>Turns the defaulted thousand separator for your instance on or off. For example: 1000 to 1,000</p>																																				
Bracket Negatives	<p>Displays negative values with or without brackets.</p>																																				
Show Field	<p>To hide the column from the report, select this item. By hiding a column the data presented on the page is not re-grouped which would occur if you removed the field from your report. For Example:</p> <p>Original Report</p> <table border="1" data-bbox="305 968 721 1199"> <thead> <tr> <th>City</th> <th>Country</th> <th>Sum Revenue</th> </tr> </thead> <tbody> <tr> <td>London</td> <td>UK</td> <td>500,000</td> </tr> <tr> <td>Manchester</td> <td>UK</td> <td>300,000</td> </tr> <tr> <td>Hamburg</td> <td>Germany</td> <td>400,000</td> </tr> <tr> <td>Munich</td> <td>Germany</td> <td>450,000</td> </tr> </tbody> </table> <p>City Column Hidden</p> <table border="1" data-bbox="305 1314 641 1545"> <thead> <tr> <th>Country</th> <th>Sum</th> <th>Revenue</th> </tr> </thead> <tbody> <tr> <td>UK</td> <td>500,000</td> <td></td> </tr> <tr> <td>UK</td> <td>300,000</td> <td></td> </tr> <tr> <td>Germany</td> <td>400,000</td> <td></td> </tr> <tr> <td>Germany</td> <td>450,000</td> <td></td> </tr> </tbody> </table> <p>City Column Removed From Report</p> <table border="1" data-bbox="305 1661 596 1801"> <thead> <tr> <th>Country</th> <th>Sum Revenue</th> </tr> </thead> <tbody> <tr> <td>UK</td> <td>800,000</td> </tr> <tr> <td>Germany</td> <td>850,000</td> </tr> </tbody> </table>	City	Country	Sum Revenue	London	UK	500,000	Manchester	UK	300,000	Hamburg	Germany	400,000	Munich	Germany	450,000	Country	Sum	Revenue	UK	500,000		UK	300,000		Germany	400,000		Germany	450,000		Country	Sum Revenue	UK	800,000	Germany	850,000
City	Country	Sum Revenue																																			
London	UK	500,000																																			
Manchester	UK	300,000																																			
Hamburg	Germany	400,000																																			
Munich	Germany	450,000																																			
Country	Sum	Revenue																																			
UK	500,000																																				
UK	300,000																																				
Germany	400,000																																				
Germany	450,000																																				
Country	Sum Revenue																																				
UK	800,000																																				
Germany	850,000																																				
Suppress Duplicates	<p>The suppression of duplicate option will remove duplicate values from a column and group the values under a single value.</p>																																				

Display Formats

Based on the type of field that the column being formatted is there are various format options. The ones listed below come default with Yellowfin, however as this is customisable there may be additional ones that comes as part of your installation.

Format Option	Description
Text	Displays as plain text
Case Formatter	Allows you to format text as Uppercase or Lowercase .
Email	Creates a hyperlink on the text that will open an email client and pre-populate the sent to address.
Flag Formatter	If your data contains ISO country codes you can display these as flags of the world instead of text.
HTML	Formats a field containing HTML tags, either by removing them, or using them, depending on user selection. For example, if you wanted to display an image using a URL the field may look something like this: <code></code> .
HTML 5 Video	Displays a video from a path stored in the field, either a full URL, or a relative path if the video is stored in the Yellowfin ROOT directory.
Link To URL	Allows you to pass the value of the returned data into a URL link. Use the hashes ## to indicate to Yellowfin where you want the column value to be placed in the url itself. For example: Formatting on a column of IP addresses and the url typed in is: http://www.google.com.au/search?hl=en&q=## This essentially means that every ip address will be placed into it into it i.e.: http://www.google.com.au/search?hl=en&q=10.100.32.44
Org Ref Code	Converts the text in the cell to the value of an internal lookup table. E.g. AU to Australia. See Org Ref Codes for more information.
Raw Formatter	Displayed the data as it would have been returned from the database – no additional formatting applied.
URL Hyperlink	Creates a hyperlink on the text and will open web page on click. Assumes the text is a legitimate URL.
YouTube Formatter	This displays a YouTube video, based on the ID being stored in the field.
	Date
Date	Displays value as a date – multiple date options exist.
Time	Displays value as a time field – multiple date options exist.
Timestamp	Displayed full date and time value
Date Part Formatter	Takes a date field and formats the display to show part of that date.
	Numeric
Numeric	Displays value as a decimal – allows you to set the decimal places to be used.
Percentage Bar	Converts a percentage value less than or equal to 100 into a bar.

Option	Description
Direction	Apply sorting to an individual column. If you wish to use multiple fields to provide a sort order, see Table Sort .

Option	Description
Font Style	Define styling options for the text in this field. This covers the font face, font size, font colour, and font style.
Alignment	Define the alignment option for text in this field.

Background	Define a custom background colour for the column.
Column Width	Define the width of the column.
Maximum Length	Define the maximum number of characters to be displayed in the cell.
Wrap Text	Wrap long cell text across multiple rows.

Option	Description
Position	Define where borders should be displayed around the edges of the cell.
Colour	Define the colour of the cell borders.
Width	Define the thickness of the cell borders.
Option	Description
Total Aggregation	Define the aggregation to be applied to the column as a total. Note: the calculated total is only available for calculated fields and will create a total based on the same rules as were used for the calculation. For example if you have a ratio of Received / Invoiced the total will equal the Sum (Received) / Sum (Invoiced)
Display Labels	Display a text label for the column summary.
Style	Define custom formatting for the summaries of this column. This covers the font face, font size, font colour, font style, and alignment.
Background	Define the background colour for the column summary.
Sub Total	Display a sub total row for each unique value in the column.

Column Drop Down Menu

[top](#)

If you wish to select a column to format from the table you can do so by clicking the menu drop down in the column title.

Year	Camp Region	Invoiced	% Max Invoiced
200	Year	138,005	
	Aggregation	169,525	
	Sort	325,943	
200	Advanced Function	633,473	
200	Format	780,247	
	Clear Formatting	688,904	
	Conditional Formatting	531,994	
200	Group Data	210,324	
200	Totals	611,470	
	Hide Field	765,249	
		733,306	
		671,489	

Option	Description
Aggregation	Allows the user to apply Aggregations to the field.

Sort	Allows the user to apply sorting to the individual field. <ul style="list-style-type: none"> • None: removes any sorting applied to the field. • Ascending: sort the data in ascending order – A to Z or 1 to 9. • Descending: sort the data in ascending order – Z to A or 9 to 1.
Advanced Function	Allows the user to apply an Advanced Function to the field.
Format	Opens the Column Formatting menu with this field selected to allow the report writer to apply formatting options.
Clear Formatting	Allows the report writer to clear all formatting options applied to this field.
Conditional Formatting	Allows the user to open the Conditional Formatting menu for this field in order to apply alerts.
Group Data	Allows the user to create groups of values based on the data in the field. e.g. age (1-18 = Youth, 19-36 = Gen Y etc)
Totals	Allows the user to apply a summary aggregation to the field.
Hide Field	Allows the user to hide the field from display.

Column Drag & Drop Options

[top](#)

Most of the formatting options available to you are accessed through the format menus. However, once your report has been generated you can use some drag and drop formatting options to change the layout of your report.

Note: the drag and drop formatting are only available whilst a report is in DRAFT mode. If the report is ACTIVE you will not see these options.

Column Order

You can change the order of your columns directly on the screen. This option is only available for 'column' based reports.

1. To move a column, place your cursor over the column title and when the cursor changes into a cross icon click and hold.
2. Now drag your column into the desired location. You will see the outline of the column and a highlighted line which indicated where the left hand border of the column will be placed.
3. Drop your column and the page will be refreshed with your column in the new location.

Year	Camp Region	Invoiced	% Max Invoiced
2007	Asia	\$11,138,005	■
	Europe	\$169,525	
	North America	\$6,325,943	■
2007		Sum: \$17,633,473	
2008	Asia	\$4,780,247	■
	Australia	\$88,904	
	Europe	\$531,994	
	North America	\$3,210,324	■

Column Width

[top](#)

You can resize a column as seen on a report by placing your cursor over the right hand column border of the column you wish to resize.

1. Click and hold the cursor. The cursor will be represented as a horizontal line and the column outline will be highlighted.
2. Drag your column to the desired width and let the cursor go. The report will refresh and your column will be resized.

Year	Camp Region	Invoiced	% Max Invoiced
2007	Asia	\$11,138,005	
	Europe	\$169,525	
	North America	\$6,325,943	
2007		Sum: \$17,633,473	
2008	Asia	\$4,780,247	
	Australia	\$88,904	
	Europe	\$531,994	
	North America	\$3,210,324
