Overview

[top](#)

Type	Icon	When to Use
Meter		You want to measure the rate of change of a measure against pre-defined targets. Useful for dashboard reporting.
Thermometer		Vertical representation of the meter chart, indicating a range of qualitative indicators.
Dial		Used to communicate key performance indicators.
Numeric Display		Shows the value of a metric on a digital display.

Chart Data Options

Option	Description
Measure	Typically a numeric value such as \$. An item that you want to measure on your Chart

Meter Chart Tutorial

[top](#)

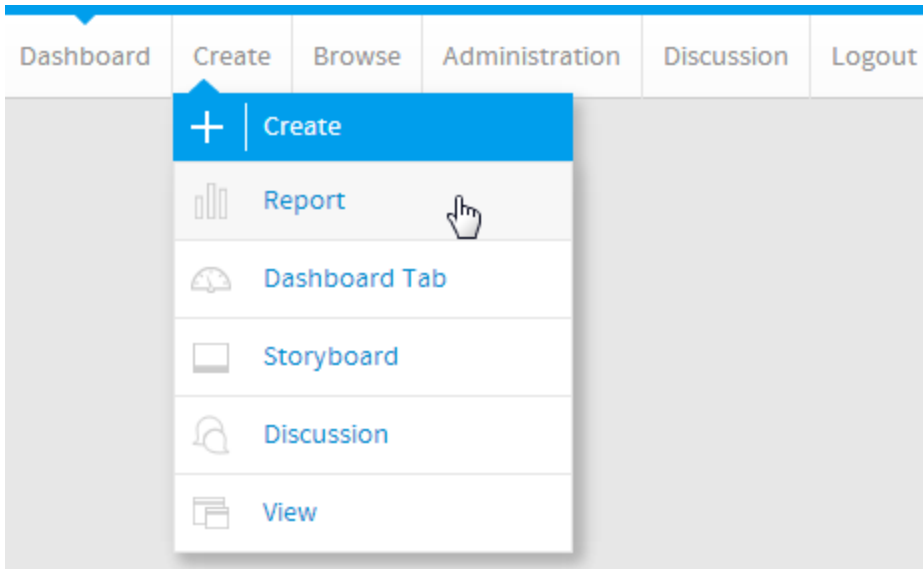

Summary

In order to set up a Meter Chart you will need:

1. Create a report with chart display
 - a. Select a field to use as the **Measure**
2. Create your chart, selecting **Meter** as the type
3. Provide the **Measure** option
4. Customise the Chart as required
5. Proceed to the **Output** step
6. Apply Conditional Formatting if the chart requires it
7. **Save** your report

Tutorial

1. Click the **Create** link in the main navigation bar of the system, and select the **Report** option.

2. You will now be on the Report Initialisation page. Ensure the **Drag and Drop Builder** has been selected to use for report creation.

3. Click on the **Ski Team** view in order to use the fields defined within it for creating the report.

4. Add **Camp Rating** to **Columns**.

5. Apply basic **Conditional Formatting** to **Avg Camp Rating** following these rules:

- Red < 5
- Orange Between 5 and 7
- Yellow Between 7 and 8
- Green Between 8 and 10

The conditional formatting will be used to highlight the meter in order to indicate how the metric is tracking against a goal.

Setup

Alert Type
These alerts are based on comparison of the column value to a set value or another column.
Best: ☒ Advanced

Style
The background colour in a matching cell will be highlighted.
Cell

Type
The value in each cell will be compared to the value specified in each alert.
Value

Alerts

<input checked="" type="checkbox"/>		Less than	<input type="button" value="v"/>	5
<input checked="" type="checkbox"/>		Between	<input type="button" value="v"/>	5
<input checked="" type="checkbox"/>		Between	<input type="button" value="v"/>	7
<input checked="" type="checkbox"/>		Between	<input type="button" value="v"/>	5
<input checked="" type="checkbox"/>		Between	<input type="button" value="v"/>	10

6. Proceed to the **Charts** step of the builder.

Report **Data** **Charts** **Output**

7. Select the **Dial** chart from the **Meter** section of the charts panel on the right of the screen.

The Chart Data options for Meter charts are the same, so this exercise can be used for any of those types, just by changing the selection made in this step to Meter or Thermometer.

Meter

8. Set the **Measure** to * Avg Camp Rating*

 **Dial**

Measure

 **Avg Camp Rating**

9. **Save** your report

■ 0.00 - 5.00 ■ 5.00 - 7.00 ■ 7.00 - 8.00 ■ 8.00 - 10.00
