

# Special Purpose Charts

## Overview

| Type                     | Icon  | When to Use   |
|--------------------------|---|---|
| Funnel                   |    | Used to show the status of stages in a process.   |
| Proportional Infographic |    | Displays segments on an image, with the segment size representing metric value.                                     |
| Comparative Infographic  |    | Displays images sized in such a way to correspond to a metric.  |
| Radar                    |    | Compare data by integrating multiple axes into a single radial figure.  |
| Waterfall                |   | Shows how an initial value is increased and decreased by a series of intermediate values, leading to a final value. |
| Event                    |   | Maps the occurrence of events against the values of a numeric data set over time.                                   |
| Week Density             |   | Shows the density of occurrences based on hour relative to other densities on the same day of the week.             |
| Digital Numeric Display  |  | Shows the value of a metric on a digital display.   |
| Numeric Display          |  | Shows the value of a metric.  |
