Overview

[top](#)

The Administration area contains all the system, user, and content settings required to setup and maintain Yellowfin's use.

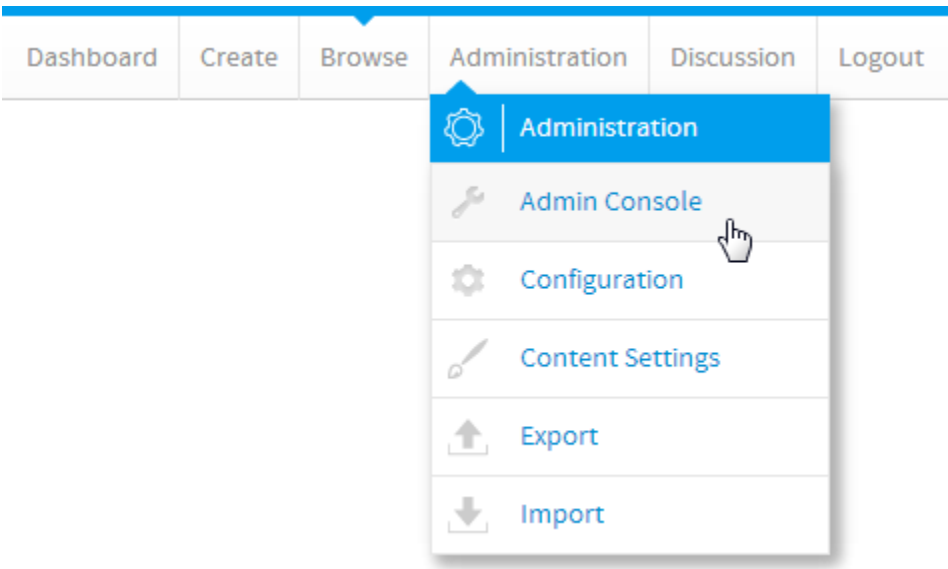

Administrator users are there to ensure:

1. Users have appropriate access to the **system**. This is done by creating users, assigning [role permissions](#), and defining any [source filter](#) requirements.
2. Users have appropriate access to **data**. This is done by creating and assigning access to [Data Sources](#) and [Views](#).
3. Users have appropriate access to **content**. This is done by creating and assigning access to [Content Categories](#).
4. The system is correctly **configured**. This is done by defining the [Configuration](#) and [Content Settings](#) settings required.

Administration Menu

[top](#)

The Administration controls are accessed through the main navigation menu.

Once the user has clicked on the **Administration** link they will be provided with the following options:

1. [Admin Console](#) - this provides the user with access to the **Admin Console** page, where then can access all available administrative features.
2. [Configuration](#) - this provides the user with direct access to the **Configuration** page, allowing them to define system settings without having to go through the main **Admin Console**.
3. [Content Settings](#) - this provides the user with direct access to the **Content Settings** page, allowing them to define the content settings and formatting defaults without having to go through the main **Admin Console**.
4. [Export](#) - this provides the user with direct access to the **Export** page for migration purposes, without having to go through the main **Admin Console**.
5. [Import](#) - this provides the user with direct access to the **Import** page for migration purposes, without having to go through the main **Admin Console**.
