Overview

[top](#)

Displays images sized in such a way to correspond to a metric.

Chart Data Options

Option	Description
Colour	This is the category label for the X axis
Image	This is the image file to be used for the shape of the infographic Note: if you wish to use your own image you will need to make sure it has some transparency. Basically, any area of the image that has colour (of any shade) will be coloured in the chart, any transparent area will be left blank. You need some transparent area in order for the chart to be anything other than a large block shape.
Horizontal Axis	Optional: this is the value displayed directly above each image
Size	Typically a numeric value such as \$. An item that you want to measure on your Chart

Comparative Infographic Tutorial
